

# Getting to know Windows 10

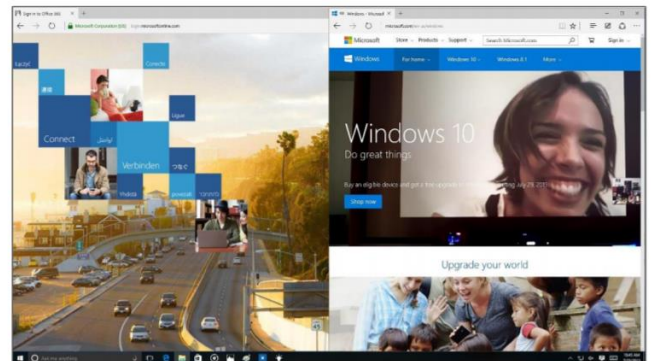

## Snap enhancements

Windows 10 includes several enhancements to Snap, making it easier to manipulate the layout of open windows on your desktop. These enhancements include:

- Consistent Snap behavior across traditional Win32 and modern apps.
- Snap Assist, which makes it easy to snap additional windows after the first one.
- Four-quadrant Snap, which enables you to fill your screen with four apps in a two-by-two configuration.

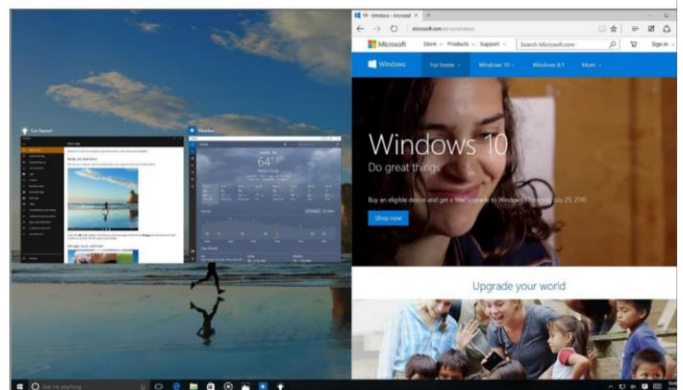

### To snap two windows side by side:

1. Drag the title bar of one window to one side of the screen, until a half-screen outline of the window appears.
2. Release the mouse (or lift your finger) to snap the window into position.
3. Repeat steps 1 and 2 for the other window, using the other side of the screen.

### When you snap an app to the left or right, Snap Assist displays thumbnails of your other open apps.

Select a thumbnail to snap that app to the other half of your screen.

### To arrange four windows in a two-by-two configuration on your screen:

1. Drag the title bar of the first window to the left or right side of the screen near a corner, until a quarter-screen outline of the window appears.
2. Release the mouse (or lift your finger) to snap the window into position.
3. Repeat steps 1 and 2 for the other three windows, using the other corners of the screen.
