

HEROES of 'safe and well'

HESSE excellence through Culture Essentials

Accidents can shatter lives...

Don't be the next person to have your life shattered.

In the last year, 10 crew members have been injured whilst opening or closing an Ice Machine.

- Always secure the lid in the open position before putting your hand or arm into the Ice Machine
- Close the lid in a controlled manner.
- Take extra care when the lid is wet as this may cause it to slip out of your hand.
